EXPERIENCE

MES Operations Data Analyst

February 2025 – Present

StarPlus Energy

Kokomo, IN

- Troubleshoot real-time lot and equipment issues in NEXT MES (Samsung SDI) and trace SECS/GEM events through Tool Control (TC) to confirm data integrity
- Analyze, validate, and correct production data with Oracle SQL in Toad; execute DML only after DBSafer approval (reason, query, Change Request, and manager sign-off)
- Determine root cause by reading Java business logic in Eclipse and C# UI event handlers in Visual Studio when logs are not enough
- Inspect application logs across multiple backend servers over SSH with SuperPuTTY and track incidents in Jira using a Kanban workflow

Software Developer

October 2024 – January 2025

The Spartan IT Group, LLC

Brownsburg, IN

- Project Lead for “The Kennel” – an e-commerce platform developed for Bulldog Community Gaming LLC, incorporating Next.js, Supabase, PostgreSQL, and React Hook Forms
- Led end-to-end application development: architecture design, database integration, API development, and front-end optimization to deliver a seamless, responsive user experience
- Deployed CI/CD pipelines, automating testing and deployment, which reduced release time by 30%

Full-Stack Software Developer

September 2023 – March 2024

Co.Lab

Remote

- Developed “Break Buddy” and “Matrimoni” applications with React.js, Tailwind CSS, Material-UI, and Firebase, focusing on creating scalable, accessible web solutions
- Designed and deployed “Break Buddy” on Vercel with a CI/CD workflow for rapid updates and reliability
- Implemented user authentication with Firebase, ensuring secure access and user data management

PROJECTS

Onyx Carwash [Live Site] | *Next.js, TypeScript, Tailwind CSS, Supabase, Zod, Vercel*

April 2026 – Present

- Built a responsive car wash booking and management platform with a premium dark-mode UI and mobile-first layout
- Implemented dynamic service listings, form validation, and pricing flows using TypeScript, Zod, and Supabase
- Deployed the platform to Vercel and optimized the experience for mobile and tablet users

Nuptial Suite [Live Site] | [GitHub] | *Next.js, TypeScript, Tailwind CSS, Supabase, Vercel*

September 2026 – Present

- Built a single-couple wedding invitation site with an envelope-gated guest experience covering venue, program, gallery, gift guide, and FAQs
- Implemented a public RSVP flow stored in Supabase, a protected couple admin scaffold, and a mobile-first UI deployed on Vercel

TECHNICAL SKILLS

Languages: C#, Java, Python, TypeScript, SQL, JavaScript, HTML/CSS

Frameworks: Next.JS, Tailwind CSS, Flask, Bootstrap

MES / Operations: NEXT MES, Tool Control (TC), Toad for Oracle, DBSafer, SuperPuTTY, Eclipse, Visual Studio, Jira

Developer Tools, Libraries: React, VS Code, Cursor, Supabase, Vercel, Github, Postman, Figma, Trello, Node.JS

EDUCATION

Coding Temple

Software Engineering - Certification

Chicago, IL

January 2023 – May 2023

De La Salle - College of Saint Benilde

BS in Hospitality, Restaurant & Institution Management

Manila, Philippines

April 2010 – July 2016
